

# Overview of New BEA Interactive Tables

Association of Public Data Users
9/21/2011
Lucas Hitt

# Background

- Data was previously available through 5 separate applications
- Web site study in 2008 determined users wanted a single system and a common look and feel
- New interactive data system was built by a team comprising staff from all BEA units

# Background

- Soft launch in April
- Full launch in June
- Users may continue to use the old system after launch
- Currently available at www.bea.gov/itable
- Version 1.2 launched in August

### Benefits

- Access all stats with one tool
- Create tables more efficiently
- Download to more formats
- Customize tables, chart
- Log-in and save complex tables for later
- Export charts for reports
- Forward tables via social media
- Enhanced chart features

- Access to all BEA interactive data national, international, regional, industry
- Easier path to statistics (tabbed approach)
- Easier to modify tables on the fly
- Download to .pdf, .xls and .csv

Interactive tables—the heart of the new application

Easier to share

Log-in to save complex tables, charts

## **Interactive Charts**
