Data on International Election Monitoring: Three Global Datasets on Election Quality, Election Events and International Election Observation (ICPSR 31461)

Principal Investigator(s): Kelley, Judith, Duke University

Summary:

This data collection focuses on elections and election monitoring throughout the world. Dataset 1, Data on International Election Monitoring (DIEM), codes the assessment and activities of international election monitoring organizations to national-level legislative and presidential elections in 108 countries from 1980-2004. Dataset 2, Quality of Elections Data (QED), codes the quality of national-level legislative and presidential elections in 172 countries from 1978 to 2004. Dataset 3, Supple... [\(more info\)](#)

Select an action:

- ☒ Browse variable list and codebook
- ☐ Run frequency or crosstabulation (with charts)
- ☐ Comparison of means
- ☐ Correlation matrix
- ☐ Comparison of correlations
- ☐ Multiple regression
- ☐ Logit/Probit (see [Note](#))
- ☐ List values of individual cases
- ☐ Recode variables
- ☐ Compute a new variable
- ☐ List user-created variables
- ☐ Download existing dataset and documentation
- ☐ Download a customized subset of variables/cases

Complications

National Longitudinal Study of Adolescent Health (Add Health), 1994-2008: Core Files [Restricted Use] (ICPSR 27021) RSS

Principal Investigator(s): Harris, Kathleen Mullan, University of North Carolina-Chapel Hill; Udry, J. Richard, University of North Carolina-Chapel Hill

Summary:

The National Longitudinal Study of Adolescent Health (Add Health) is a longitudinal study of a nationally representative sample of adolescents in grades 7-12 in the United States during the 1994-1995 school year. The Add Health cohort has been followed into young adulthood with four in-home interviews, the most recent in 2008, when the sample was aged 24-32. Add Health combines longitudinal survey data on respondents' social, economic, psychological, and physical well-being with contextual ... ([more info](#))

Technology

Questions

- What problem are we solving?
- How effective is this against the risks we perceive?
- How do we accommodate requests for software, complementary datasets, etc?
- How thoroughly must we review output before sharing it with the analyst?

Thank you for your time and attention!
